

**Congratulations!! You have successfully decoded the file. Please follow the steps below to submit your response.**

## HealthRx Programming Challenge (Qualifier 1 – STEP 2)

### Introduction

Consume this API to upload your basic details like Name, Email, College Id, Registration No., and your Code you have written to decode the base64 encoded file in the previous step.

### Overview

You should adhere to the signature of the API and should get a success message from the response

### Authentication

This is an open API and does not require any authorization

### Error Codes

Any response other than **'Your details have been submitted successfully'** and status code: **200** would be considered unsuccessful attempt. You can retry in case of any response message other than **'Your details have been submitted successfully'**.

### Rate limit

You can only try and call the API 10 times at max. In case of multiple attempts, the last attempt would be considered the final submission
